## Bishop Johnson School & College Jun 2002-Jul 2004

## **PROJECTS**

## Online Grocery Store Project Manager, Developer (frontend Database)

May2024-July2024

Grocery Store is a web application built using the Spring Framework and Mysql database. It is designed to provide a realistic e-commerce experience for purchasing fruits, vegetables, drinks, and more. The application includes a comprehensive cart and billing module, simulating the entire shopping process from selection to checkout. Additionally, users can download their bill as a PDF, adding to the convenience and realism of the shopping experience. To ensure security, the application utilizes Spring Security for authentication and authorization.

## Cineplanet

#### Project Manager, Developer (frontend Database)

Jan2023-Mar2023

Cineplanet is a web based application developed using spring, spring boot, as backend, mysql as database and frontend technology HTML,CSS, JavaScript and Bootstrap to handle users request to book tickets of any released movie in particular theater. The system allows you to maintain records of all the users who had booked tickets.

## **Online Auction System**

Developer Jan 2013 - May 2013

ONLINE AUCTION system project based on MS.NET technology using C# language and database used is Microsoft SQL Server 2000, also used HTML, CSS, JavaScript to design User interface. This project has three modules Admin, Auctioner & Bidder. All the functionality regarding auction is implemented and person with less bidding amount won the auction.
